¹ When a person is convicted for several crimes, the person is counted as the most serious punishable crime and each crime - separately according to the respective type of crime.

Methodological notes

The statistical survey on crimes, accused and persons convicted with inflicted penalties ensures information on the basis of annual data, received from the regional, district and military courts.

The object of the survey is the activity of the regional, district and military courts and the Specialized Criminal Court on penal trials of general, private and administrative nature. According to the Judiciary System Act (amended and supplemented by SG 32 of 26 April 2022), the Specialized Criminal Court is abolished. Criminal cases of the first instance before the Specialised Criminal Court, in which a dispositional hearing has been held, become subject to the jurisdiction of the Sofia City Court and their examination continues by the panel of judges which held the hearing. The judges of the Trial Chambers who have not been reassigned to the Sofia City Court shall be seconded to take part in the examination of the cases until the conclusion of the proceedings on them.

Units of a survey are crimes, accused and persons convicted with a sentence that has come into force during the reference year.

The number of **crimes with penalties inflicted** includes proceedings that finished with conditional or effective sentences irrespective of the number of perpetrators.

A crime committed by more than one person (in complicity) is counted as a crime with a penalty inflicted when at least one of the accused persons is effectively or conditionally convicted. In case when all persons have been acquitted, a crime committed in complicity ends with acquittal. A crime is counted as suspended when the proceeding against the perpetrator or all perpetrators ends with suspension.

The number of **accused persons** includes effectively and conditionally sentenced persons, as well as acquitted persons, persons released from penalty, and persons against whom the proceedings have been suspended.

The number of **persons convicted** are those with an effective or conditional sentence that has come into force.

When a crime is committed by several persons, the crime is counted only once, and each perpetrator - individually depending on the results of the proceeding. In case there is a convicted person for more than one committed crime in one proceeding, the most severe punishment is counted. If a person is convicted for several crimes, the person is counted against the most serious punishable offence and each crime is counted separately according to the respective type of crime.

The age of persons convicted is indicated in years of age at the time of the crime.

Juveniles are persons aged 14 - 17 years.

Adults are persons aged 18 and over.

Convicted juvenile persons are included in the total number of persons convicted.

According to Chapter Three, Art. 31, para. 1 and 2 of the Penal Code **criminally responsible** is the person of age - who has reached 18 years of age, who in a state of sanity commits a crime. **A juvenile** who has reached 14 years of age, but who has not reached 18 years of age, shall be **criminally responsible** if they were able to realize the quality and the importance of the act and direct their actions.

The criminal activity rate is calculated as a correlation between the number of persons convicted and the average annual number of the criminally responsible population (aged 14 and over) per 100 000 persons.

The population estimate as of 31 December 2022 reflects the changes in population numbers and structure recorded in the Census 2021. In this regard, there is a break in the time series for all coefficients since 2022.

The data on Crimes, Accused and Persons Convicted are obtained from an exhaustive survey by filling in the statistical questionnaire 'Card for accused person', by the pre-trial and trial proceedings and data from the administrative source - Unified Information System for Counteraction to Criminality (UISCC).

The applied methodology and data from the survey on 'Crimes, accused and persons convicted' are published on the NSI's website (www.nsi.bg) as well as in Informational System INFOSTAT (https://infostat.nsi.bg/infostat/pages/module.jsf?x_2=56).
