Methodological notes

The statistical data about the newly built residential buildings and dwellings are prepared based on quarterly reports of the municipal administrations.

In the scope of the survey are newly built residential buildings with approved or valid usage licenses according to Regulation No. 2/31.07.2003 of the Ministry of Regional Development and Public Works.

Living floor space includes rooms and kitchens with over 4 sq. m of floor space.

Service floor space is the floor space of rooms and kitchens with less than 4 square meters of floor space, vestibules with a portal or other screen, corridors, bathrooms, toilets, larders, hanging closets and other service rooms, such as drying rooms, laundries or balconies regardless of their space.

The useful floor space of the dwelling is the sum of the living floor space and the service floor space.

The average useful floor space is the ratio between the useful floor space and the number of dwellings.
